

ABSTRACT

A plastic storage bin comprising a container and a label holder is disclosed. The label holder is configured to rotatably and detachably couple with the container. The label holder preferably comprises a clear rigid plastic designed to hold a 3" x 5" card that describes the contents of the container. Specifically, the preferred label holder is configured to rotatably and detachably couple with a label holder securing means by cooperatively engaging a plurality of protrusions with a plurality of apertures. The storage bin further comprises a lid configured to mate with the container so as to create a positive seal. The plastic storage bin with a rotatably attachable label holder is easily assembled and disassembled without the use of any tools, glue, tape or other adhesives.
